

Workplace Injury Prevention

Empowering you
to impact profitability.

Comprehensive web-based and desktop solutions to help organizations prevent workplace injuries, reduce workers' compensation costs and other injury-related costs, increase productivity and, most importantly, impact profitability.

SOLUTIONS OVERVIEW

“Whether an organization is large or small, workplace injuries can have a devastating effect on productivity, morale and profitability. And yet, the challenge of addressing this issue varies across large multinational and small organizations. That’s why choosing the right injury prevention solution is so essential.”

Kim Weiss Lopez Chief Executive Officer Remedy Interactive

\$52 billion

Workplace injuries cost U.S. businesses nearly \$52 billion annually. The least expensive claim is the one that never happens.

Injury-free employees are more productive—and better for your bottom line. But how do you know who's at risk for injury?

Our software enables you to assess the likelihood of injuries and prevent those injuries, providing a complete injury prevention solution.

Here's what's at stake, and what we've done for our customers...

Our OES product has reduced the number of injury-related lost work days within our customers' workforce by

38%

OES has reduced customers' direct workers' compensation costs by an average of

33%

Injury Prevention and Profitability Solutions For All Levels of Program Sophistication

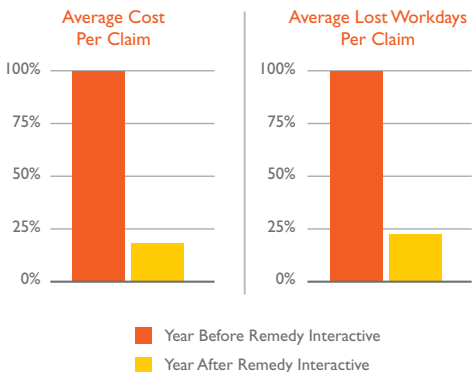

OES office

Designed for larger national or global enterprises that have thousands of employees working in several offices, OES is well suited for meeting the needs of multiple stakeholders. Most organizations that choose OES already have extensive risk and injury prevention expertise and are seeking to augment their established health and safety program.

OES's web-based software includes a robust Analytics Engine that enables these organizations to identify and analyze risk of injuries so they can prioritize resources. To ensure the highest level of success, OES is supported by strategic account managers who customize and scale OES for each customer: OES is the only scalable solution to produce quantifiable cost savings for Global 1000 organizations.

Reduce claim costs and lost work days by as much as 80%

Here's what happened when a Fortune 500 Company deployed Remedy Interactive's OES Office.

iMitigate

iMitigate is a web-based software application that enables organizations to jump-start their injury prevention program. iMitigate assesses risks of injury and teaches best practices to employers and employees so they can work to achieve an injury-free office environment.

This alternative, designed for organizations with a simple structure, includes tutorial-based wizards, online program coaching and standardized reporting.

iMitigate is the perfect solution for any organization that needs to create a new injury prevention program.

Organizations of any size that are looking for injury prevention tools to reduce repetitive strain injuries can benefit from RSI Guard.

RSIGuard is a desktop software solution that helps individual users reduce computer-related injury risk. RSI Guard does this by helping users improve their work patterns with behavioral modification tools, strain exposure management tools and usage and behavior reports.

It is available for purchase online, and it can be used in concert with OES and iMitigate.
