

Jump-Start Your Office Ergonomics Program

ensuring that employees remain injury-free and productive.

Now a single individual can manage the prevention of common office injuries that impair employee health and productivity. Web-based iMitigate software gives you complete control of your ergonomics program by automating key processes such as program setup, employee discomfort and risk identification, and risk of injury reduction. This easy-to-use software helps you dramatically reduce risk of musculoskeletal disorders and other soft tissue-related injuries in a few simple steps and still have time for other vital health and safety issues. In addition, the program teaches you best practices for DSE Regulations and OSHA compliance.

Succeed with iMitigate

Pinpoint at-risk employees:

The discomfort assessment measures employee discomfort and risk of injury to streamline injury mitigation efforts.

Automate your efforts:

The software facilitates program setup and employee communications, injury prevention treatment prioritization, and ergonomics best practices coaching.

Achieve your goals:

iMitigate allows an organization to set goals for program adoption, track employee participation, and measure risk reduction efforts.

Prove your success:

The intuitive dashboard quickly analyzes program results and clarifies the next steps in your ergonomics program follow-up.

Rely on experts:

Remedy Interactive works with leading health practitioners and injury prevention scientists to ensure scientific accuracy and relevance of iMitigate's assessment questions and risk algorithms.

Engage your employees:

The audio version of the assessment and training content achieves a more memorable user experience and enhanced learning retention; 80% of our users prefer audio to written content!

Choose relevant content:

Your training and assessment can include industry-validated content for PDAs & Hand-Held Devices, and UK-specific content for DSE Regulations and pregnant workers.

Deliver safety in a snap:

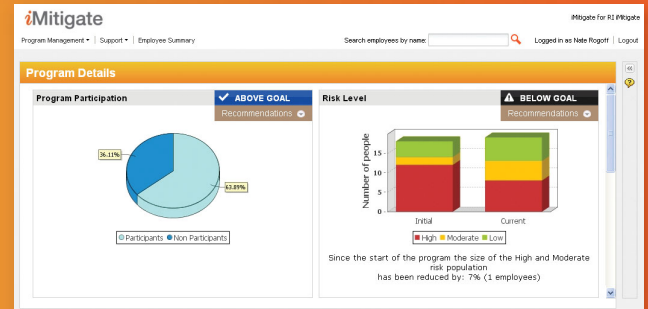

More than 10,000 servers worldwide ensure rapid delivery of iMitigate's web-based software to office, home and remote workers.

Integrate easily:

The software integrates with other systems including single sign-on, HR and learning management systems.

Be in compliance:

Use of iMitigate ensures compliance with OSHA and DSE Regulations.

Graphic displays make it easy to monitor employee participation and risk levels.
