Remedy Interactive Provides Enterprise-Wide Injury Prevention Software & Services to Health Net

SAUSALITO, CA - December 13, 2005 - Remedy Interactive, Inc., announced today that Health Net, Inc., one of the nation's largest publicly traded managed health care companies, successfully launched its first software-based injury prevention program based on Remedy Interactive's OES to more than 8,000 employees. Health Net joins a long list of Global 2000 organizations that are significantly decreasing workers' compensation risks and costs by deploying this unique and innovative solution set that proactively mitigates risk and creates operational efficiencies around injury prevention.

For years, software applications in the workers' compensation market have addressed the challenges that arise after an employee becomes injured on the job. However, few companies have taken a proactive approach to prevent workers' compensation claims from happening in the first place. As the total costs of injuries increase each year, companies will need a solution that quickly and expertly identifies and assesses the highest risk employees and provides a preventive plan for each of them. Remedy Interactive's solutions are founded on the premise that the least expensive claim is the one that never happens. Remedy Interactive's OES is the only software solution that has been proven to help organizations identify exposures, mitigate risk, and reduce costs.

"Health Net is committed to a safe workplace and to being a great place to work," said Jillian Guerra, Health Net's Director of Workers' Compensation and Safety. "We chose Remedy Interactive for our large-scale injury prevention solution because it meets our employee safety objectives."

Remedy Interactive helps companies prevent and mitigate risk of injuries by leveraging a company's own business processes to aggregate and analyze important data about their workers and environments, and advising and implementing safer methodologies for those environments before an injury occurs. As a result, Remedy Interactive's approach has saved companies millions of dollars in workers' compensation costs each year.

"Health Net sees the strong connection between injury prevention and reducing workers' compensation costs," said Kim Lopez, CEO of Remedy Interactive. "We look forward to further demonstrating that the connection is a strong one

and that companies' efforts to create a safe workplace and prevent injuries can significantly decrease their total costs."
