Remedy Interactive Expands On-Demand Injury Prevention Solution to Industrial Environments

SAUSALITO, CA - July 10, 2006 - Remedy Interactive, Inc., a leading provider of enterprise solutions that help Global 1000 companies reduce their workers' compensation costs, today announced OES 3.1 for managing injury prevention across multiple workplace environments including industrial facilities. Remedy Interactive's OES is a flexible web-based solution that helps risk managers and health and safety directors reduce corporate injury rates and costs by up to 40 percent. With the OES, corporations can identify risk of workplace injury proactively, automate injury prevention activities, and increase operational efficiencies.

Currently, a large California-based natural gas and electric company is beta testing OES 3.1 among a population of mechanics and technicians. The OES 3.1 will help this organization better understand its risk of workplace injuries and reduce related costs. Research shows that industrial environments incur the highest level of risk. According to the National Safety Council's (NSC) "Report on Injuries in America 2003," 3.4 million American workers suffered disabling injuries. Work injuries cost Americans \$156.2 billion, which amounts to \$1,120 per worker.

Remedy Interactive's OES 3.1 includes the following new capabilities and features, which seamlessly integrate with the OES platform:

- Enhanced analytics
- New ACE (Accepted Controls Exist) Index that provides information about the potential to impact risk with known and accepted controls
- Reports that tell the user whether known controls exist to mitigate the exposures
- Calculations that describe the impact a specific change will have on the organization's overall risk
- Expanded flexibility in delivering on-line information to employees
- On-line training modules, based on human kinesiology, that can be configured to match the unique risks of various jobs
- Configuration capabilities that allow for the inclusion of customer-specific photos in an on-line assessment
- Deeper abilities to integrate into an enterprise's processes
- Single sign-on capabilities that better meet the needs of the largest enterprises
- Delivery of role-specific information to injury prevention stakeholders, increasing their abilities to take action

“In addition to continually improving OES 3.0 for our current customers, we added new capabilities in OES 3.1 to accommodate our customers’ growing demands for industrial environments as well,” said Kim Lopez, CEO of Remedy Interactive. “The OES is the only hosted injury prevention solution available that can be tailored to meet the needs of multiple work environments.”

Pricing and Availability
