Remedy Interactive and RIHealth Bring Enterprise Injury Prevention Solutions to The Netherlands

SAUSALITO, CA - February 5, 2008 - Remedy Interactive, Inc., a leading provider of enterprise solutions that help Global 1000 companies reduce absence and lost workdays, today announced a new distribution partnership with Netherlands-based RIHealth BV, a new entity formed by the principals of a leading regional consulting firm. RIHealth will deploy Remedy Interactive's enterprise injury prevention software to customers in The Netherlands, Belgium, and Luxembourg and serves as the company's first European sales and support representative for the OES and RSIGuard families of software applications.

Recent changes in employment law in The Netherlands encourage employers and employees to take an active role in managing employee health and reducing absenteeism. As part of the agreement, RIHealth will provide sales and support for Remedy Interactive's OES and RSIGuard solutions to customers in the Benelux region in conjunction with on-site services, accessories, equipment, and strategic risk management counsel. All software and services are tailored for European regulations and market expectations. The OES is a flexible web-based solution that helps risk managers, and health and safety directors, in office and non-office work environments use business process automation to create efficiencies and drive injury prevention program effectiveness throughout their organizations. RSIGuard is an award-winning health and productivity management application that offers a complete suite of integrated tools for identifying, mitigating, and monitoring health risks in the desktop environment.

"As a global leader in injury prevention and risk management solutions, Remedy Interactive has proven that by helping companies focus on injury prevention, they can significantly reduce their costs of workplace injuries and worker absenteeism," said Gert-Jan Kraaijeveld, head of Sales and Strategy at RIHealth. "We're committed to selling and supporting the OES and RSIGuard and bringing the benefits of an injury prevention and health management program to forward-thinking companies in this region."

"A strong European presence is central to our goal of serving multinational organizations and critical to our broader vision of being the company that the world trusts to create injury-free and productive workplaces," said Erik Andersen, Vice President of Strategic Partnerships, Remedy Interactive. "We partnered with RIHealth because they mirror our philosophy on injury prevention, and their principals have a strong track record in delivering professional services and
